## MOONBAY ADJUSTABLE PEDESTAL **PAVER & DECKING SUPPORT**

Joist cradle

Support for any kind of substructure:

- timber batten (joists)
- composite battens

 aluminium or steel support sections Width of the support: up to 63 mm. Fixing holes on both sides of support for mechanical fixing.

### Shim

For use with marble, stone slabs, granite pavers, etc. for:

- added anti-slip performance
- shock and sound absorption
- compensation for stone thickness variation

#### Spacer tabs

The head can be fitted with spacer tabs, to give the desired opening between tiles (for water drainage and ventilation).

#### Head

The head of the support is screwed directly on to the base, or on to the extender. Diameter of 150 mm, can be fitted with various components to support differing surfaces.

### Fix collar

Fix and lock the screws after adjustment, ensure pedestals are secured at desired heights and are easily removed when not required.

Slope corrector Compensate slope from 0%-5% Assembled on top of pedestals Can be choose to use it or not for different installation condition

## Extender

Extend and add height of adjustable pedestal Diameter 120mm

Adjustment ring Diameter 115 mm Screw pitch reversed

Base

The base can be simply positioned or fixed to any substrate
