- ✓ Available in Silver anodised fitted with Black silicone carbide anti-slip

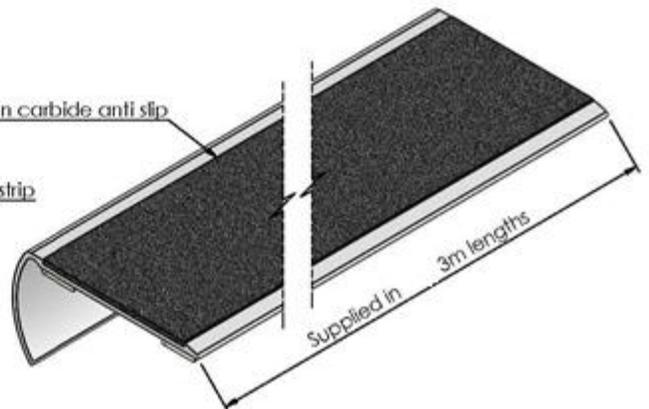

Compliance

- ✓ Tested to the requirements of AS4586:2013 with a P5 Slip Resistance rating

Silicon carbide anti slip

Industrial strength Adhesive strip

INSTALLATION INSTRUCTIONS:

MJ157 is supplied with high grab pressure sensitive adhesive pre-applied to the backing and is designed to be installed on a clean, smooth surface.

Ensure surface is levelled, clean and smooth prior to removing the adhesive protection and applying the Light Bullnose trim to the surface. It is recommended that a bead of silicone or mastic adhesive is run along the bottom edges of the MJ157 to fill in any surface variations of the concrete floor. This will remove any subsequent “tapping” effect that could develop.

When the MJ157 has been fitted we recommend using a small roller along the entire length to ensure firm adherence.
